SUMMARY

Motivated Cloud Administrator with hands-on Azure experience using Terraform and Infrastructure as Code. Skilled in VMs, VNets, NSGs, RBAC, and Azure Monitor, seeking to deploy secure, scalable cloud infrastructure.

EXPERIENCE

Marketer and administrator

Industrial Laboratory Services

September 2023 – December 2023, Walvis Bay, Namibia

- Filled **multiple administrative support roles**, ensuring uninterrupted operations across reporting, client coordination, and internal processes.
- Conducted **market research on 3+ potential service expansions**, including dielectric oil testing, identifying new business opportunities.
- Developed **targeted marketing strategies** for laboratory and subsidiary services, improving outreach and increasing visibility.
- Supported management decision-making by organizing **client data, service records, and research findings** into 5+ structured reports.

I.T. support technician

iConsult

October 2022 – November 2022, Walvis Bay, Namibia

- Acted as an IT Support Technician in troubleshooting **hardware, software, and network connectivity issues** for end users across office systems.
- Resolved **20+ user support requests**, minimizing downtime and ensuring uninterrupted daily operations.
- Diagnosed and repaired **desktop hardware, operating system, and peripheral issues** to maintain workstation reliability.
- Supported **network troubleshooting and connectivity setup**, helping users regain access to internal systems and services.

PROJECT

Azure Enterprise Landing Zone (Bicep)

github.com/Omen1907/azure-enterprise-landing-zone • February 2026 – February 2026

- Designed and deployed an **Azure Enterprise Landing Zone** using Bicep, provisioning 5+ core resources for scalable and standardized infrastructure.
- Set up **Network Security Groups (NSGs)** securing inbound and outbound traffic for all 5+ deployed resources.
- Enabled **monitoring and logging** for 10+ key resources to ensure observability and operational insight.

Azure Secure VM (Terraform)

github.com/Omen1907/terraform-azure-secure-vm • February 2026 – February 2026

- Deployed a **Linux Virtual Machine** in Azure using Terraform with secure configuration.
- Configured **NSGs to secure 100% of inbound/outbound traffic**.
- Set up **SSH key-based authentication** for secure remote access.
- Enabled **monitoring and logging** for +2 resources using Azure Monitor to track performance and security events.

CERTIFICATIONS

Azure Administrator Associate (AZ-104), Azure Fundamentals (AZ-900)

Microsoft • 2026

- Demonstrates expertise in managing Azure cloud environments, key skills for a Cloud Administrator role.

Zero to Mastery Complete Web Developer

Zero to Mastery • 2025

- Provides foundational full-stack development skills that support building and deploying cloud-based applications and APIs.

Responsive Web Design, JavaScript Algorithms & Data Structures

FreeCodeCamp • 2024

SKILLS

Cloud & Infrastructure: Microsoft Azure, Virtual Machines, Virtual Networks (VNet), Network Security Groups (NSG)

Infrastructure as Code: Terraform, Bicep, ARM Templates

Monitoring & Security: Azure Monitor, Log Analytics, RBAC, SSH Authentication

Development & Scripting: JavaScript, React, Node.js, HTML, CSS

Tools: Git, GitHub, Linux
